DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 9 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "...the first electrical and mechanical connection bypasses the second integrated circuit substrate" However, the instant invention does not disclose this aspect. Rather, Fig. 5 of the instant invention shows that the signal is coupled to the third integrated circuit substrate through the second integrated circuit substrate.

Claim 9 recites the limitation "... device side ... face a first direction and the backsides face a second direction." Note that the instant invention discloses that both the device side and the backside face the PCB. Claims 15, 21 and 29 recite the similar limitation.

Claim 19 recite the limitation "a direct electrical coupling is provided between the signal path and an electronic circuit of the fifth integrated circuit substrate, and wherein the signal path is free of a direct electrical coupling with an any electronic circuit of the third integrated circuit substrate." However, the instant invention does not disclose this aspect. Rather, Fig. 5 of the instant invention shows that the signal is coupled to the third integrated circuit substrate through the fourth integrated circuit substrate. Claims 52 and 75 recite the similar limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Morishita (US 6392292).

Regarding claims 1 and 6, insofar as understood, Fig. 5 of Morishita shows an electronic device comprising:

- a first integrated circuit substrate 1 with electrical connections/bumps 8;
- a second integrated circuit electronic substrate 2 with electrical connections/bumps 8 on the first integrated circuit substrate ;
- a third integrated circuit electronic substrate 3 with connections/bumps 8 on the second integrated circuit substrate wherein the second integrated circuit substrate is between the first and third integrated circuit electronic substrates;
- a first electrical and mechanical connection (from 1 to 3) between the first and third integrated circuit substrates wherein the first electrical and mechanical connection/bump to the second integrated circuit substrate;
- a second electrical and mechanical connection (from 2 to 3) between the second and third integrated circuit electronic substrates;

a third electrical and mechanical connection (from 1 to 2) between the first and second integrated circuit substrates; and

conductive traces on the first, second and third integrated circuit electronic substrates to provide couplings between the integrated circuit electronic substrates

Allowable Subject Matter

Claims 9-14, 22-28, 42-51, 55-60 and 62-63 are allowed.

Response to Arguments

Applicant's arguments with respect to pending claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2811

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
